

Canvas Panels and Floor are an option

AFRICAN THATCH 5 (Hexangle)

Our Thatch Gazebos provide many practical solutions to your garden needs and they are also an amazing eye-catching feature! They are extremely popular due to their rustic look, machine round timber construction and affordable price. They look especially brilliant over hot tubs and swim spas.

We use pressure treated timber, guaranteed for 10 years with no need for additional stain or preparation. The roof features Cape Reed Thatch Tiles which offer a modern twist to the traditional thatched style roof. This beautifully crafted outdoor gazebo has been designed to compliment your garden area, so you can make the most of your outdoor space whatever the weather. You have the option of canvas panels to every side, a roof curtain to make the interior 100% waterproof and a bar and high stools to add to either side of the ballastrades.
